

How do I find rules for games?

Trust us, we won't design any games that we don't know how to play. We can't. We graduated from the K-I-S-S school of game design: we like to keep things simple.

But, even though all of our games are very simple to play, we have so many of them that we sometimes forget how to play them. So, to jog our imperfect memories, we had to write ourselves some notes so that we could remember how to play them. You, of course, can consider our notes your rules.

To learn how to play a particular game, click on the "Game Rules" button at the bottom of any game's window.

[insert a screen capture of the bottom of the RatRace game, featuring the "Game Rules" button with an arrow pointing to it, or circled]

You'll get a short description instructing you how to play the game.

[insert screen capture, the rules for RatRace game]

You'll also see a chart showing you how many iCoins you will earn, based on how many points you score. When you click on the "Cash Out" button to end the game, those iCoins will be deposited into your account, so that you can use them to enter drawings for prizes.
