

What can I win by playing Treasure Hunt?

Money or icoins. (On a really good day, some of both!)

Depending on your luck, your finger dexterity, your ability to take direction from a one-legged Pirate Captain, and your patience, you can win either real money to spend as you please, or icoins to use for entering our iwin.com contests and winning merchandise and other prizes connected with a promotion by one of our advertising sponsors.

We at iwin.com recognize that there are some really addictive personalities out there, so, In our wisdom, we've placed a limit on what any one registered member can win per day. You are restricted to winning only one (1) money prize per day, or up to 1,000 icoins. After that, you just have to go outside and get some fresh air --unless, of course, you live in Los Angeles (near us!), in which case, you'll be better off playing another one of our games with your air conditioner turned on.

THE MONEY PRIZES

The value of the money prizes vary from \$10 to \$10,000. Actually, the money we shell out breaks down into these denominations:

\$10
\$100
\$500
\$500
\$5,000
\$10,000

THE ICOIN PRIZES

The value of the icoins prizes range from 5 icoins to 1,000 icoins, and there's a whole range of values in between that you don't need to know about, since you ought to be happy if you find any at all, considering that you'll be slaving under a hot sun all day long, digging under pixel after pixel, while that charming ogre of a Pirate Captain yells and screams at you if your finger-clicking isn't fast enough or your land-lubber status doesn't transform itself into a knave worthy of his scurvy hide soon enough. So, be happy with the icoins you find! And remember to spend it to enter a contest drawing. Don't just bury it like some greedy pirate and expect to dig it up later. We've already got enough treasure to dig up, thank you very much.
